key.aspx ===== How to: [ tricks/32-101-2-youtube-v...]( tricks/32-101-2-youtube-videoplayback.html) ----- willej Videos on YouTube might be problematic. The problem is that when the video is submitted to YouTube, it get's treated as a video embedded on a web page. YouTube then sends your IP to Google to find out if you've been doing the same kind of thing before. As a result the video may not show up for you. Instead try running your own server and putting the video on it. Also for uploading your videos to YouTube, I believe there's a 'demo' mode. That might help you out as well. --- bheil Thanks! I really appreciate your help, especially considering the obvious pain this was to discover. Hey there, I'm not affiliated with YT and I have no idea what causes this, but here's my advice. First, consider: Is your target demographic uploading their videos? It could be that they're uploading videos that they want to be on Youtube. With those videos, it's not going to hurt them to upload them to Youtube. If they're uploading videos for viewing at home, that's a problem. Also, if your videos are copyrighted, consider: don't give them to YT I think the best way to make sure your videos aren't blocked on Youtube is to host them at a cloud storage service like dropbox or box. Of course, now you have to worry about people sharing your videos and creating copies for themselves. A team of Iranian specialists have gone to the site of a new blast which has killed at least seven people, including four Revolutionary Guards, in southeast Tehran on Monday evening. A police official said it was unclear whether the bomb was planted by a local individual, a dissident or the Islamic State group. #IranA job well done: Very hard to reach the #Ghazvini blast site in #Tehran. pic.twitter.com/jZBw6 82157476af
